

UMM E RUBAB

Computer Science Graduate | Full-Stack, Mobile & VR Developer

Pakistan | +92 331 5303175 | ummerubab8663@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Professional Profile

Computer Science graduate with hands-on experience in Full-Stack Web Development, Mobile Application Development, Virtual Reality (VR), IoT, and Software Engineering. Skilled in Laravel, React.js, Unity 3D, Flutter, Firebase, REST APIs, and modern development tools. Passionate about building innovative, scalable, and user-centric software solutions.

Education

Bachelor of Science in Computer Science (BSCS)

2022–2026

Air University Aerospace & Aviation Campus, Kamra | CGPA: 3.10

Final Year Project

Virtual Mart – 3D Non-Immersive VR Shopping Store

Final Year Project

Designed and developed a 3D Non-Immersive Virtual Reality shopping application using Unity 3D and Blender. Integrated a Real-Time Inventory Management System powered by Laravel, PHP, React.js, and Vite, enabling seamless synchronization of products and stock between the VR environment and the inventory platform. Implemented REST APIs, database integration, and full-stack development concepts. The project demonstrates practical expertise in VR development, software engineering, backend integration, and modern web technologies.

GitHub Repository: github.com/masha8663/V-Mart_Inventory

Experience & Professional Training

Web Development Intern, Developers Hub

2025

Built responsive web applications using React Vite, Laravel, PHP, HTML, CSS, JavaScript, GitHub and Postman.

Technology Intern, Atom Global Information

Jul 2025–Sep 2025

Worked with Unity 3D, Figma, IoT devices, VR systems and digital twin concepts.

Technical Intern, Pakistan Aeronautical Complex, Kamra

Jun 2024–Jul 2024

Studied LRUs, avionics, radar technology and aircraft systems.

IBM/Coursera Certificate

Jul 2026

Flutter and Dart: Developing iOS, Android, and Mobile Apps. Certificate ID: Y9DPR5GRNSP1.

Projects

Full Inventory System – Android Application

Android inventory and stock management application.

Inventory Management Web Application

Laravel/PHP inventory management system.

Mini Compiler Using Python

Lexical analysis and compiler implementation.

Parallel Encryption Tool

Java Caesar Cipher with parallel processing.

AI Insurance Claim Predictor

Machine learning prediction system with Flask.

Smart Agriculture System

Cisco Packet Tracer IoT solution.

Barcode Detection and Decoding

Python image processing using pyzbar.

Ludo Game Using Multithreading

Java multithreaded game.

Fitness Dashboard

C# Windows Forms dashboard.

Technical Skills

Languages: Java, Python, PHP, Kotlin, C++, JavaScript, Dart

Web: Laravel, React.js, Vite, HTML, CSS, MySQL, REST APIs

Mobile: Flutter, Android Studio, Firebase, XML

VR: Unity 3D, Blender

Tools: Docker, Git, GitHub, Postman, Cisco Packet Tracer

Languages

Urdu (Native) | English (Professional)
